SVI-OGW

Open Gateway

The Open Gateway (SVI-OGW) enables the rapid delivery of converged services across IMS, NGN and Legacy networks. It enables operators to leverage existing infrastructure, extend their return-on-investment and rapidly deploy new services.

- **LEVERAGE** existing infrastructure
- **MITIGATE** against End-of-Life
- **RAPIDLY** deploy new services
- **EXTEND** return-on-investment

Whether you're looking to interwork legacy CAMEL/INAP/MAP with HTTP/2, Diameter or SIP, or need lookups over SQL/SOAP/HTTP to a subscriber database or billing server the SVI-OGW will deliver.

Benefits

- \$ COST SAVINGS**
 Deliver only services you need instead of paying for full application suites that you will never use
- ⚡ POWERFUL**
 Services built using industry standard Python script
- 📁 Extendable**
 Extend services using your in-house resources or let our experts develop at fixed costs
- 🕒 FAST**
 Script based delivery removes complication and upgrade cycles
- ↔ FLEXIBLE**
 Allows monitoring, termination and transition over API's
- 🖥️ NFV ready**
