

SQUIRE TECHNOLOGIES RECOMMENDED SERVER SPECIFICATIONS

[For up to 5000 simultaneous calls or 50 msg/sec](#)

Intel Xeon ES-1410 2.80GHz - or equivalent
8GB 1333 MHz RAM
RAID 500GB 7.2k HDD
Dual Hot Plug Power Supplies
Quad Port 1Gb Ethernet
CentOS v7.3 64 bit

[For up to 10,000 simultaneous calls or 100 msg/sec](#)

2x Intel Xeon ES-2609 2.40GHz - or equivalent
16GB 1333 MHz RAM
RAID 500GB 10k HDD
Dual Hot Plug Power Supplies
Quad Port 1Gb Ethernet
CentOS v7.3 64 bit

[For up to 20,000 simultaneous calls](#)

2x Intel Xeon ES-2430 2.20GHz - or equivalent
64GB 1333 MHz RAM
RAID 300GB 15k HDD
Dual Hot Plug Power Supplies
Quad Port 1Gb Ethernet
CentOS v7.3 64 bit

Notes:

1. "SVI" refers to our product range unless otherwise specified. Further information is available from: enquiries@squire-technologies.co.uk
2. If a customer has a requirement for a non-redundant system (i.e. single plane) operating in the range of 4k-10k simultaneous calls, it is strongly recommended that an additional server is used to run the billing and report management system.
3. If a redundant system (i.e. dual plane) is required to operate in the range of 4k-20k simultaneous calls, it is strongly recommended that an additional two servers are used to run the billing and report management system.
